Re: Request for No Further Action  
Veteran's Park  
Fayetteville, Cumberland County, NC  
NONCD0002900

Dear Mr. Hampton:

I have reviewed the file information provided to the Inactive Hazardous Sites Branch (Branch), and the additional data provided on October 8, 2013 by your consultant Duncklee and Dunham including the request for No Further Action.

Under the direction of the Branch, a subsequent groundwater sample was collected via temporary well to be analyzed for 4-isopropyltoluene. The subsequent groundwater analysis results were non detect for that compound and that groundwater is being protected.

Based on this data, this Site has been transferred to the "No Further Action" category in the Inactive Hazardous Sites Branch's inventory of sites. No further remedial action will be required unless the Department later determines, based on new information or information not previously provided to the Department, that hazardous substances are present at values exceeding current standards or that the Department was provided with false or incomplete information

If you have additional questions about the requirements that apply to your site, please contact me at (910) 796-7411.

Sincerely,

David L. Brown, L.G,  
Inactive Hazardous Sites Branch  
Superfund Section
